

SeaBoost Cream – Why it is so Special

“There is nothing on the market like SeaBoost Cream...” This balm was crafted for the purpose of bringing rejuvenation and restoration to the largest organ of the body...your skin. The cream is stored in special Miron Glass, which enhances energy. You will probably want to re-use the jar when the cream is finished!

Made with rich, raw ingredients from our earth, SeaBoost Cream is 100% natural with ABSOLUTELY NO CHEMICALS, FILLERS OR BINDERS. Petroleum will not be found in this jar, nor will any harmful preservatives, parabens, sulfates, artificial colors, artificial fragrances, SLS or harsh chemicals of any kind. This means Seaboost Cream is safe for babies, children and pregnant women alike.

What can SeaBoost Cream be used for? Athletes foot, Psoriasis, Moles, Sunburn, Wrinkles, Dry Skin and general skin health. It sells for \$29.95 for a 1.7 oz. jar and \$54.95 for a 3.4 oz. jar. A jar lasts a long time!

How to use:

Apply a small amount to the affected area and gently rub in. Best applied daily, or morning and night. Be aware that SeaBoost Cream may sting if applied to broken skin. Our balm has no added perfumes and possesses a natural, unrefined earthy scent. The cream is extremely concentrated - a little will go a long way!

SeaBoost Cream has a thick, oil-rich texture which is semi-firm when scooped from the jar, but then gradually melts into the skin. Be careful not to get it in the eyes.

SeaBoost Cream Ingredients

Sea minerals, olive oil, coconut oil, argon oil, macadamia oil, jojoba oil, avocado oil, beeswax and sea collagen, plus supa yew, papaya, sheep sorrel, coleus amboinicus, stinging nettle, pacific yew and nasturtium.

All of these ingredients are listed below, along with benefits they are renowned for.

Sea Minerals is pure, concentrated ocean water from the shores of Queensland, Australia. We take 100 gallons of pure Australian ocean water and evaporate it down to a gallon, which yields a low-sodium, ultra-dense mineral and trace mineral solution. Our concentrated sea minerals ingredient is packed with all 76 naturally occurring minerals found in ocean water. These minerals are micro-nutrients which have been known to help nourish the skin.

Olive Oil was originally discovered 5,000 years ago and was used by the Egyptians, Phoenicians and Greeks for its high levels of antioxidants. Bursting with vitamin E, it is a super weapon against free radicals. It promotes a radiant, smooth complexion while encouraging an increase in skin elasticity. The ancients knew its beauty secret; enjoy this ageless experience through our cream.

Coconut Oil may be linked to some potential skin benefits, including reducing inflammation, keeping skin moisturized and helping to heal wounds. The medium-chain fatty acids found in coconut oil also possess antimicrobial properties that can help treat acne and protect the skin from harmful bacteria.

Argon Oil protects from sun damage, moisturizes skin, treats a number of skin conditions including acne and infections, improves wound healing, soothes atopic dermatitis and offers anti-aging effects.

Macadamia Oil is a lightweight oil that is well absorbed without feeling greasy. It's high in monounsaturated fatty acids, including Oleic Acid (Omega 9), which are very moisturizing, regenerating and softening to the skin. These fatty acids also have anti-inflammatory properties.

Jojoba Oil has anti-inflammatory properties which help to tame chaffing and chapping, reduce redness caused by dryness, ease the effects of eczema and rosacea, and keep skin calm and comfortable. The vitamin E and B-complex vitamins in the Jojoba oil help in skin repair and damage control.

Avocado Oil calms itchy skin and heals and replenishes chapped and dry skin. As it hydrates and moisturizes, it shields the skin from ultraviolet radiation.

Beeswax carries antiviral, anti-inflammatory, and antibacterial properties that are essential in fighting chapped skin and bacterial infections that tend to affect us most in the dry, winter months. It forms a protective wall by sealing in moisture in our skin without smothering and clogging up the pores.

Sea Collagen increases type 1 collagen levels that can help your skin look firmer, increase smoothness, and help skin cells keep renewing and repairing normally. It improves wound healing and helps with scars, rashes and burns.

Supa Yew is a blend of sea minerals and hand-selected herbs grown on a chemical-free farm. These herbs have been preserved without the use of heat to maintain their benefits and are high in antioxidants and powerful against free radicals.

Papaya is full of antioxidant nutrients, including vitamin C, B vitamins, folate, beta-carotene and flavonoids, potassium and magnesium; these assist in clearing away dead skin cells, making way for new cells to come forth and revealing glowing new skin to the world.

Sheep Sorrel has been historically used to treat inflammation, scurvy and even cancer. This fantastic plant grows native in Eurasia and the British Isles and holds an abundance of disease-fighting molecules, such as vitamins A, B-Complex, C, D, E and K.

Coleus Amboinicus is a plant native to Southern and Eastern Africa. It has been used in Brazil since the early days for the treatment of skin ulcerations. In India, the juice of the leaves is used to treat skin allergies; the juice is also used to treat burns in Asian regions.

Stinging Nettle has been used for hundreds of years to treat painful muscles and joints, eczema, arthritis, gout, and anemia. It is also used for urinary tract infections, hay fever (allergic rhinitis), or in compresses or creams for treating joint pain, sprains and strains, tendonitis, and insect bites.

Pacific Yew is an evergreen timber tree of the Yew family. It is used to treat ovarian and breast tumors, lung cancer, and Kaposi's sarcoma, and is also used for treating diphtheria, tapeworms, swollen tonsils (tonsillitis), seizures (epilepsy), muscle and joint pain (rheumatism), urinary tract conditions, and liver conditions.

Nasturtium is a genus of roughly 80 species of annual and perennial herbaceous flowering plants. Both the leaves and petals of the nasturtium plant are packed with nutrition, containing high levels of vitamin C. It has the ability to improve the immune system, tackling sore throats, coughs, and colds, as well as bacterial and fungal infections.

PSORIASIS SUFFERERS

You Need

SeaBoost Cream

Do you or someone you know suffer from Psoriasis?

We invite you to try all natural SeaBoost Cream.

Have you tried everything else, and want to find something that works for Psoriasis? Is it possible that a natural product which can cost 1/10th that of a pharmaceutical cream could work as well or better? Might it remove the crust, stop the itching and reduce redness, as it nourishes the skin, without causing the side effects of a pharmaceutical or hydrocortisone cream?

At Max-Well, we believe that God truly desires us to live a healthy life. He has made available to us many things to help satisfy the needs of the body. SeaBoost Cream is a sampling of some of the wonderful nutrients God has made. It softens and nourishes the skin, leaving the body to do what it does so well, to heal itself. SeaBoost Cream contains seven herbs, whose potency has been locked in through a proprietary process. We invite you to experience SeaBoost Cream for yourself.

"I am 78 years old, and have been plagued with Psoriasis for years on my legs from a little below my knees, all around the calves down to the edge of my feet, on my lower arms down to my wrists, and on my forehead, my nose down to my lower lip. The Psoriasis on my forehead, cheeks and chin was very red. To forego embarrassment in public, I would constantly apply 1% Hydrocortisone Cream and scratch off the flakes of skin on my chin, my nose, and at the corners of my lips. But it never solved the problem. Commercial preparations only gave me temporary relief. The itching on my arms and legs caused me to scratch, sometimes until I was bleeding. The flaking of the dead skin that came off when I scratched was terrible."

"That was before I found SeaBoost Cream. It took only a few days for me to see what an awesome product it is! When I put the SeaBoost Cream on my face the first morning, it burned. However, I felt that maybe there was healing in the pain, and left it on. When I applied it on the second morning, it hardly burned at all. On the third morning there was no burning. This is wonderful stuff. I no longer have to worry about those unsightly spots when I go out in public. Without reservation I recommend Max-Well SeaBoost Cream to all Psoriasis sufferers." Paul S. in Nebraska

SeaBoost Cream and Various Skin Conditions

Acne First, cleanse your skin, then apply a small amount of SeaBoost Cream and work in. SeaBoost Cream nourishes your skin and helps it to heal. Once again, be prepared that it may sting.

Agent Orange Burns This is a tough one. But since SeaBoost Cream is good for burns, some have found it helpful for Agent Orange burns. Where the skin has been burned very deeply, we also recommend taking Max-Well Ocean Treasure while topically nourishing the skin.

Basil Cell Carcinoma is the world's most common cancer, with more than one million people diagnosed every year in the U.S. alone. And it shouldn't be taken lightly; this skin cancer can be disfiguring if not treated promptly. It is a slow growing cancer which accounts for 90% of all skin cancers. The growths typically occur in places that are exposed to the sun, like the face, shoulders, neck, hands, and back. While you are pursuing other treatments, we encourage you to apply SeaBoost Cream at least twice a day. For smaller areas, put some SeaBoost Cream on a Band Aide and cover the area. Remove and replace once or twice a day. You may be surprised with the results!

Bites SeaBoost Cream may or may not be helpful with insect bites. If you have it handy, you can try a bit and see.

Burns, Sunburn Because of its many nutrients, the results can be quite amazing when SeaBoost Cream is used for sunburns and burns. For burns, do not apply until after the skin has stopped weeping.

Dermatitis is a general term that describes an inflammation of the skin. There are different types of dermatitis, including seborrheic dermatitis and atopic dermatitis (eczema). Although the disorder can have many causes and occur in many forms, it usually involves swollen, reddened and itchy skin.

Dermatitis is a common condition that usually isn't life-threatening or contagious. But it can make you feel uncomfortable and self-conscious. A combination of self-care steps and medications can help you treat dermatitis. We recommend SeaBoost Cream for some types of dermatitis, as it nourishes the skin and helps it to heal itself.

Eczema: SeaBoost Cream is not recommended for eczema or any other skin condition that is weeping.

Seborrheic Dermatitis: For those who don't mind a greasy scalp for a few hours, SeaBoost Cream can be helpful for Seborrheic Dermatitis (dandruff). Apply liberally to scalp, let it soak in overnight, then shampoo. You may be surprised at just how much one application of SeaBoost Cream can accomplish. For locations other than the scalp, apply a small amount and work in. Try this for a few days and see what a difference it can make.

Extreme Temperature Changes When you are going in and out of cold temperatures, it can wreak havoc on your skin. To help protect it, apply a small amount of SeaBoost Cream and work in.

Hemorrhoids This isn't for everyone, since SeaBoost Cream applied to hemorrhoids can really sting. But we have some customers who are willing to brave the sting for the longer term good.

Herpes While SeaBoost Cream may prove helpful for Herpes outbreaks, once again the problem is systemic. So, get yourself some Max-Well Ocean Treasure to go along with the cream.

Hives We don't recommend it for hives. No positive results have been noted.

Liver Spots are more than skin deep. Some have used SeaBoost Cream for liver spots, but we recommend that, along with a topical application, a person take Max-Well Ocean Treasure to provide the liver with more of what it needs to be healthy.

Melanoma is the most dangerous type of skin cancer. It is the leading cause of death from skin disease. It involves cells called melanocytes, which produce a skin pigment called melanin. Melanin is responsible for skin and hair color. We do recommend SeaBoost Cream for Melanoma, and also recommend Max-Well Ocean Treasure, to minister to internal needs of the body. However, don't use these in lieu of medical attention. SeaBoost Cream may help while further medical attention is sought.

The key to treating melanoma is recognizing symptoms early. You might not notice a small spot of concern if you don't look carefully, so perform thorough self-examinations monthly.

Moles A Band Aide is recommended when using SeaBoost Cream for moles. Apply a small amount to the Band Aide, then place the Band Aide over the mole. You are trying to get good coverage on the mole without having SeaBoost Cream seep outside of the Band Aide. This isn't easy to accomplish. SeaBoost Cream can stain clothing, and it can take two or more months for something to happen, so care and patience are called for. One of our customers noted that after two months the mole crumbled and fell off on his finger. However, this isn't usually the case. You will have to determine whether you want to give this a try. SeaBoost Cream is not caustic or acidic like Black Salve. Black Salve has been found to work, but can leave a sore and a scar. SeaBoost Cream works by nourishing the skin.

Rashes SeaBoost Cream is recommended for many types of rashes. Caution must be exercised when the skin is broken, as the burning sensation can be intense. However, if you can put up with the pain, healing can result. SeaBoost Cream nourishes the skin, and helps it to repair itself.

Rosacea It won't hurt to try SeaBoost Cream on rosacea. However, any benefits may not be noticeable.

Shingles This is a difficult condition, and once again SeaBoost Cream may or may not prove helpful.

Vitiligo is a skin condition in which there is loss of pigment (color) from certain areas of skin, resulting in irregular white patches that feel like normal skin. We recommend SeaBoost Cream for Vitiligo.

Symptoms

Vitiligo is more noticeable in darker skinned people because of the contrast of white patches against dark skin. There is a sudden or gradual appearance of flat areas of normal-feeling skin with complete pigment loss. Lesions appear as flat areas with no pigment and with a darker border. The edges are sharply defined but irregular. Frequently affected areas are the face, elbows and knees, hands and feet, and genitalia.

Wounds Who would guess that a product that can really sting when applied to open skin might be used for wounds. This isn't for everyone, but some have found it to be helpful to apply to their minor wounds.
